

For the intake of Master programme, applicants are expected to have solid grounding in intermediate microeconomics and macroeconomics, mathematics (or quantitative methods) and econometrics. More preparation on an advanced undergraduate level will be helpful. The following book titles are provided as reference:

Microeconomics:

Snyder & Nicholson (2017) **Microeconomic Theory: Basic Principles and Extensions**, South-Western College.

Intermediate Microeconomics:

Varian, Hal R. (2014) **Intermediate Microeconomics: A Modern Approach**, 9th ed., W. W. Norton & Company.

Jehle, Geoffrey A. and Philip J. Reny (2011) **Advanced Microeconomic Theory**, 3rd ed., Prentice Hall.

Macroeconomics:

Dornbushch (2018) **Macroeconomics**, McGraw-Hill.

Mankiw (2019) **Macroeconomics**, Worth Publisher.

Mathematics:

Dowling (2011) **Schaum's Outline of Introduction to Mathematical Economics**, McGraw-Hill.

Wainwright & Chiang (2005) **Fundamental Methods of Mathematical Economics**, McGraw-Hill.

Econometrics:

Gujarati, Porter & Gunasekar (2017) **Basic Econometrics**, McGraw-Hill.

Wooldridge, Jeffrey M. (2019) **Introductory Econometrics: A Modern Approach**, 7th ed., Cengage Learning.
